

S&C Power Delivery Services

From the substation to the power panel, S&C field-service personnel are experts in providing comprehensive power delivery solutions and services. We commit to resolving complex challenges and delivering a high-quality, engineered system on schedule and within budget.

Our Services

- Power system upgrades and retrofits
- Breaker and relay testing services
- Substation design/build/repair
- Custom panel design and build
- 24/7 emergency services, parts support, and remote monitoring
- Electrical equipment and safety training
- On-site or in-house repair services for electrical equipment
- Preventative maintenance and service agreements for your equipment
- Power system studies (arc flash, short circuit, coordination, harmonic, and protective relay settings)
- Arc flash remediation strategies to reduce downstream incident energy
- Start-up and commissioning services
- Project management services that include scheduling, purchasing, tracking, engineering, and construction management
- Upgrades and modernization services at a cost far lower than replacement

Why S&C?

S&C offers fast and local support via our **five regional service centers**, which are dedicated to increasing our customers' reliability and profitability. By focusing on safety, reducing operating costs, and improving productivity, our solutions are specifically tailored to your system applications and budget.

Proven Experience

S&C field-service engineers and technicians have a proven record of delivering projects on time and within budget.

In-house Resources

S&C's in-house engineers and resources are available for every step of a project.

Real-world Applications

Our dedicated professionals know how to develop solutions across utility, industrial, and commercial applications.

Flexibility

We approach complex design challenges with flexibility while ensuring technical accuracy.

High Reliability

We specialize in extending equipment life, improving reliability of existing electrical systems, and protecting critical loads.

Long-term Support

Our contractual service agreements maintain facilities after energization and reduce operating costs.

Warranty & Re-warranty

S&C offers extended warranty and re-warranty packages to lengthen equipment life.

Safety

We have an uncompromising safety culture and robust training programs to mitigate safety hazards.
